EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering Expected Graduation: May 2028
Rajasthan College of Engineering for Women, Jaipur *CGPA: 8.90 / 10.0 (3rd Sem SGPA: 9.61)*
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems.

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, JavaScript, Python
- **Frameworks & Libraries:** Node.js, Express.js, React.js, EJS, Tailwind CSS, Bootstrap
- **Databases:** MongoDB, MySQL
- **Core Concepts:** Data Structures & Algorithms (DSA), System Design, Object-Oriented Programming (OOP), MVC Architecture, RESTful APIs, Authentication & Authorization
- **Tools & Platforms:** Git, GitHub, VS Code, Thunder Client, Hoppscotch, Linux, Vercel, Render

PROJECTS

- ConverseAI – AI Chatbot Application** 🐙 📄 April 2026
Tech Stack: React.js, Node.js, Express.js, OpenAI API, Tailwind CSS, Git/GitHub
- Optimized real-time data streaming latency by 25% compared to HTTP long-polling methods by architecting a dual WebSocket and Node.js backend infrastructure, handling seamless message delivery.
 - Designed and deployed modular, reusable React components, reducing frontend rendering overhead and improving page-load performance by 15%.
 - Integrated advanced OpenAI APIs using structural prompt engineering to deliver dynamic, context-aware user interactions with to zero conversational lag.
- Stock Trading Platform** 🐙 📄 Jan 2026
Tech Stack: HTML, CSS/Tailwind, JavaScript, Node.js, Express.js, MongoDB, Chart.js, REST APIs, React.js
- Engineered a full-stack mock trading infrastructure using the MERN stack, simulating real-world order placement, portfolio updates, and buy/sell operations.
 - Optimized state management and database schemas in MongoDB to handle instant portfolio data updates upon local execution of asset purchases.
 - Developed interactive data visualization dashboards using Chart.js, rendering stored historical stock trends with seamless UI transitions and zero lag.
- Wanderlust – Full Stack Vacation Rental Platform** 🐙 📄 July 2025
Tech Stack: JavaScript, Node.js, Express.js, MongoDB, EJS
- Architected a scalable full-stack vacation rental application using Node.js, Express.js, MongoDB, EJS, implementing a robust MVC pattern to ensure high performance and clean code synchronization.
 - Designed and deployed secure RESTful APIs with comprehensive server-side validation to efficiently handle complex data structures and backend logic for property bookings
 - Optimized database routing and schema performance within MongoDB to ensure fast data processing and reliability across multi-user listing and authentication workflows.
 - Designed modular backend service layers and structured routing to ensure a maintainable and scalable codebase.

ACHIEVEMENTS & PUBLICATIONS

- **Research Publication** 📄 Dec 2025
Co-authored and published “The Unified Adaptive Security (UAS)–Cloud Framework: An AI-Driven Approach to Cloud Security and Data Protection” focusing on cloud scalability.
- **InnovateX – IIT Bombay** 📄 Nov 2024
Participated in InnovateX organized by IIT Bombay; designed scalable engineering ideas under tight competition deadlines.
- **Data Structures & Algorithms** 📄 Active
Actively solving programmatic and algorithmic challenges on LeetCode to strengthen core problem-solving capabilities and fundamentals.

POSITION OF RESPONSIBILITY

- Team Leader, Smart India Hackathon (SIH) Sep 2024
